Career Objective

Hard-working professional with proven knowledge of programming and troubleshooting. A perfect balance of time management, multitasking, project planning, and organization abilities. Aiming to leverage my skills to become a successful name in the IT industry to make it more useful and beneficial to mankind.

An enthusiastic fresher with self-motivation currently pursuing Bachelor in technology in information technology. Eager to learn new technology and methodologies. Excellent teamwork, interpersonal and communication skills. Looking to start a career as entry level professional with a reputed IT industry.

Educational Qualification

Bachelor of Technology in Information Technology
Dr. Babasaheb Ambedkar Technological University -
Pursuing

12th (Higher Secondary Examination)
Maharashtra State Board of secondary and higher
Education – **57.38%**

10th (Secondary Examination)
State Board of Secondary Education - **81.20%**

Projects Engineering

(Engineering. Mini Project, 5th Semester)

Survey Form on Mental Health

In this project I perform the survey form in which we can check the mental health of the any one, basically is for the student who are suffering from the mental issues and that don't know. In this project we use the basic concept of web development and we perform the project as we use the HTML, CSS, Bootstrap, MySql and Php.

Work on Arduino

In which we perform the projects or the use of the Arduino kit we perform some basic project.

(6th Semester)

ANPR (Automatic Number Plate Detection)

In this project we learn new things while doing the project. We develop the project that detection of the number on the number plate. So use the Python language for that project and use some libraries as numpy, OCR and so on.

(7th Semester)

Crypto Currency Tracker

In this project we use the API for the tracking of the value of the Crypto Currency. Use of the API is done with the use of the Technology i.e. HTML, JavaScript, Node Js, Bootstrap, etc.

Skills:-

JAVA, HTML, CSS, C , Web design.

Some key points which I automated are:

- * My Work in the survey form is to make the best design of that form for that I have use the HTML and Css.
- * In the ANPR My work is to Use of the OpenCv in that project. OpenCV is the library of choice for implementing computer vision applications. OpenCV is compatible with Python. OpenCV's Optical Character Recognition (OCR) functions to read the text from the detected objects
- * In the Crypto Currency Tracker, My work role is to use the Api which is on the cryptographic online site then give the connectivity between that Api and our Project.

Additional Info:

- * In **Machine Learning** have the basic knowledge about the ML algorithm.
- * Actively participating in the knowledge getting events that are perform in the college, Taking part in the Sports as Cricket, football, thug of war, and so.
- * Having the interest In videography, Photo Editing , video Editing.

* Strength

Good in the Communication Skill .
Active and dynamic approach to work,
Quick Learner, Creative,
Flexibility to Handle Any Situations,
Smart Working, Complex Problem-Solving.

Hobbies:

learning new things, Dancing ,Playing Cricket
